

## Bach Flowers remedies

On the Spooky<sup>2</sup> forum is a [thread](#) containing various people's Spooky<sup>2</sup> custom databases for various Bach Flower remedies and combinations of flower frequencies.

The presets in this collection are derived from these Spooky<sup>2</sup> custom databases. There are preset for Coil, Contact, Laser, Plasma, Remote, and Scalar. The presets for Contact use a dynamic harmonic over 1 MHz on Out 2 so that the low frequencies are less uncomfortable. While it is possible to get a powerful Contact treatment using the High Power port of Spooky Boost, you may prefer a Contact treatment from the low power Colloidal Silver port.
